Experience

Full Stack Web & Mobile developper

Paris, France

Freelance

Sep 2021 – now

- Implemented a Web Application for an international e-commerce featuring a realtime messaging app by using technologies **NextJs**, **ExpressJs**, **Docker**, **Socket.IO** and a **CI/CD** pipeline allowing **automatic deployment of packages** in github organization
- Designed a seamless mobile VTC application using technologies such as **Docker**, **NodeJs & ExpressJs**, **React Native & Expo**, **Prisma & PostgreSQL**, **Socket.IO**

Software Engineer

Paris, France

Capgemini

Sep 2024 – now

- Contributed to the design and development of a web application using React (frontend) and Django (back-end).
- Reduced Jenkins test rendering time by **92%** through the implementation of **concurrent programming** techniques and key architectural decisions by refactoring existing codebase by applying **clean architecture** and **design patterns**
- Reduced Jenkins agent workload by migrating a Cucumber test automation pipeline to Tanzu and enabling automated execution from Jira using Kafka and Kadda.
- Developed and deployed a **CI/CD pipeline**, enabling seamless continuous integration and reducing test execution time by 75%.

Software Engineer

Dubai, UAE(remote)

ATH Software LLC

Sep 2023 – Oct 2024

- Developed **Puma's** e-commerce Web Shop by using **Sanity** and **Nextjs**
- Designed **Midea's** and an **airline** e-commerce Web App by using **HyGraph** and **Nextjs**

AI & Software Engineer Intern

Algiers, Algeria

LRIA

Dec 2022 – June 2023

- Designed and developed a **real-time facial** recognition system using state-of-the-art **deep learning** techniques and computer vision algorithms.
- The system architecture is composed of **three core modules** communicating on WebSocket on **encrypted tunnels** :
 - **Face Detection**: Real-time identification of human faces in video streams using support vector machine (SVM).
 - **Face Recognition**: Identity verification through trained deep learning models (CNNs).
 - **Web Application**: Built a secure and responsive interface for administrators to monitor activity on realtime, manage users, and view analytics.

Education

Sorbonne université

Paris, France

MSc in software engineering (STL:Science et technologie du logiciel)

- **Salutatorian** : first year
- **Coursework**: Advanced Algorithms & Analysis, Random data structures generation, Search Engines & Graphs, static analysis by abstract interpretation, Concurrent Programming Paradigms

University of Science and Technology Houari Boumediene

Algiers, Algeria

BS in mathematics and Computer Science

- **Valedictorian**: Highest Honors ([link](#) 🔗)

- **Coursework:** Mathematical Analysis, Linear Algebra, Algorithms and data structures, Computer Architecture, Databases, Compilation and Operating Systems

Technologies

Languages: TypeScript, Python, Java, Ocaml, Haskell

Technologies: NextJs & React, Angular, SpringBoot, Expo, Django, Docker & Kubernetes
